DETAILED ACTION

Election/Restrictions

1. applicant's response filed on 6/2/05 arguing that the previous restriction requirement is improper is considered and is persuasive. Therefore, the previous restriction is withdrawn and replaced with the following restriction.

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

I. A method comprising selecting the varactor of figures 8a, 8b, 8c, 8d, 10a, 10b, 10c, 10d and 17, wherein the varactor has a an electrode 116 located opposite to the gate electrode, in those figures;

II. A method comprising selecting a varactor of figure 9a, wherein the varactor has a two parts, heavily doped semiconductor gate, and has a body electrode 116 located across the gate electrodes in the figure, but not opposite to the gate electrode;

III. A method comprising selecting a varactor of figure 9b, wherein a varactor has a two parts havily doped semiconductor gate, and also has a semiconductor island which is confined between the two outermost trench insulations shown in the figure;

IV. A method comprising selecting a varactor of figures 12, 13, and 19, wherein the varactor has gate insulators beneath the gate electrode with two different thicknesses;

V. A method comprising selecting a varactor of figure 14, wherein the gate electrode comprises two heavily doped portions with different conductivity types;

VI. A method comprising selecting a varactor of figure 15, wherein the gate electrode has two portions with different conductivity type, and the gate insulator has three different thicknesses beneath the gate electrode; and

VII. A method comprising selecting a varactor of figures 16 and 21, wherein the gate insulator has three different thicknesses beneath the gate electrode and the gate electrode is a continuous heavily doped region.

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 61 is generic.
4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
